

POLA GAUTAM SAI

Computer Science Engineering – Data Science

7328028936 goutam300505@gmail.com Pola Gautam Sai

SUMMARY

I am a tech student specializing in full-stack web development with strong proficiency in JavaScript, TypeScript, React, and Node.js. I excel in building scalable applications to solve real-world problems, leveraging my programming skills in Python and C. With hands-on project experience, I thrive on writing clean code and continuously learning new technologies to contribute effectively to impactful engineering solutions.

EXPERIENCE

Technical Head

[DSBS Students Association](#)

11/2025 | Student Association

- Managed the technical team and ensured project pace
- Maintained GitHub repositories for projects
- Managed live websites, servers, domains, email, and third-party services

Summer Intern

[IIT Ropar](#)

05/2025 – 07/2025 | Ropar | Internship

- Developed and consumed RESTful APIs using Node.js
- Participated in end-to-end application development
- Collaborated in debugging, testing, and optimizing applications

EDUCATION

B.Tech – CSE (DS)

[SRM Institute of Science and Technology – Kattankulathur](#)

2023 – 2027 | Kattankulathur | CGPA: 9.6

Class XII

[Gandhi Public School, Gunupur](#)

2022 – 2023 | Gunupur | Score: 87.6%

Class X

[Gandhi Public School, Gunupur](#)

2020 – 2021 | Gunupur | Score: 89.6%

KEY ACHIEVEMENTS

Awards and Recognitions

Achieved top positions in various technical competitions, showcasing problem-solving skills and technical proficiency:

- 1st Prize – DSA Treasure Hunt | SYMPOSIUM, SRM KTR | Aug 2025
- 1st Prize – AI Escape Room’25 | ACM SRM SIGAPP | Nov 2025
- 2nd Prize – TechQuiz | DataKon, SRM KTR | Oct 2025
- 3rd Prize – Hackgenix | TECHNO SUMMIT '25, SIST University | Sep 2025

CERTIFICATIONS

- Programming in Java – NPTEL
- Introduction to Database Management System – NPTEL
- Introduction to Machine Learning – NPTEL
- Data Analytics Job Simulation – DELOITTE

SKILLS

Express.js	JavaScript	TypeScript
React	Node.js	Python
Clean Code	Java	Next.js
MongoDB	PostgreSQL	RESTful API
Swing	GUI	AWS
EC2	S3	Docker
JWT	GitHub	Material UI
REST	NLP	OAuth

PROJECTS

[Query2Concept](#)

- AI-powered educational web application
- Built an AI-based DSA learning assistant using **semantic search (FAISS + embeddings)**
 - Developed a **Neo4j knowledge graph** for prerequisite-aware learning paths
 - Integrated **Mistral LLM (Ollama)** for personalized concept explanations
 - Implemented a full-stack system with **real-time query processing and recommendations**

[Multi-Disease Prediction System](#)

- Machine Learning Project
- Built a **Multi-Disease Prediction System** using ML (Diabetes, Heart, Parkinson’s).
 - Applied **SVM & Logistic Regression** with model comparison and optimization.
 - Performed **EDA, preprocessing, and feature engineering**.
 - Developed a **Streamlit web app** for real-time predictions.
