

HEMA SAI DEEP ANKAM

AI & ML Engineering Student | Python Developer |
Computer Vision Enthusiast

□ Chennai, India | □ +91 8919777608 | □
ha8624@srmist.edu.in

PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning at SRM Institute of Science and Technology. Skilled in Python, Machine Learning, Deep Learning, Computer Vision, and Data Analysis with hands-on experience developing intelligent systems and real-world AI applications.

TECHNICAL SKILLS

- Programming Languages: Python, Java, C, C++, JavaScript
- AI/ML Technologies: Machine Learning, Deep Learning, Computer Vision, YOLO, OpenCV, EasyOCR/Tesseract
- Web & Database: HTML, CSS, SQL, MySQL
- Tools & Platforms: Google Earth Engine, scikit-learn, pandas, Remote Sensing

EDUCATION

Bachelor of Technology in Computer Science Engineering (AI & ML)

SRM Institute of Science and Technology, Chennai | 2023 – Present

CGPA: 9.71

Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Web Development, Software Engineering.

CERTIFICATIONS

- NPTEL Java Programming Certification
- NPTEL Introduction to Database Management
- Udemy C Programming for Beginners – Master the C Language
- EduSkill Google AI ML Virtual Internship

PROJECTS

Helmet Detection and Number Plate Recognition System

Python | Deep Learning | Computer Vision | YOLO | OpenCV

- Built an intelligent traffic monitoring system using YOLO for helmet detection and OCR for number plate recognition.
- Utilized OpenCV, EasyOCR/Tesseract, and Python for real-time image and video processing.
- Automatically detected riders without helmets and extracted vehicle number plates for traffic surveillance and rule enforcement.

Movie Recommendation System

Python | Machine Learning | Recommendation Systems

- Developed a recommendation engine using collaborative and content-based filtering techniques.
- Implemented recommendation models using pandas, scikit-learn, and cosine similarity.
- Generated personalized movie recommendations based on user ratings and viewing preferences.

Water Quality Monitoring Using Satellite Data

Python | Machine Learning | Remote Sensing

- Built a water quality monitoring system using satellite imagery and machine learning techniques.
- Used Google Earth Engine, Remote Sensing datasets, and scikit-learn for environmental analysis.
- Analyzed pollution, turbidity, and vegetation impact to assess overall water health.
